**Unified Communications**

Minerva is a distributor of Two Way Radio, TETRA Radio, Wireless Broadband, Point to Point, Point to Multi-Point, Wi-Fi and Mesh Solutions, LTE, 5G, Unified Communications, Telecom Cabling, Antennas, and Power Remote Managed Solutions. Minerva and vendor partnerships offer a comprehensive range of services including project design and consultancy, site surveys, project commissioning, technical training and pre- and post-sales support.

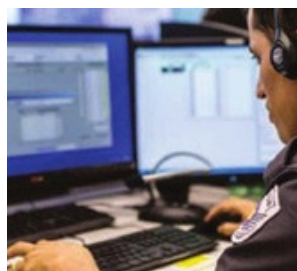

With our head office and logistic centre located in Dubai, UAE, this is our regional logistic hub from which Minerva serves the growing demand of the Sub Saharan Africa, North Africa, GCC, Middle East, Pakistan and Afghanistan markets.

Minerva's in house technical team provide a wide scope of knowledge and expertise which allows them to assist in the design and delivery of solutions across our full product range.

Minerva supports market verticals from small commercial and private enterprises to large industrial and multinational operations. Our regional customers are highly experienced integrators who deploy solutions for government, public safety, transportation, logistics, telecommunications, airports, hospitality, retail and oil and gas.

Having an excellent reputation for exceeding customers demands, we pride ourselves in offering leading products from world renowned vendors, providing both superior customer service and knowledgeable technical support allowing us to continually develop and maintain long term customer relationships.
